Profile

Industrial engineer (BSc Technische Bedrijfskunde, Saxion, 2024). At Van Rijn Products I turned my graduation research into practice by leading the rollout of a new ERP system, and I now advise them on automation and AI. At Speed40 I am implementation manager for AI-driven ERP software. I also run my own company, Klaasystems.

I get excited by improvement projects I can carry out myself, from analysis to implementation.

Experience

Implementation Manager, Speed40 Software

Lijnden, November 2025 to present

- Responsible for implementing the AI-driven ERP software and its aftercare. 15 customers implemented so far. I build the integrations between systems myself.

Automation and AI Consultant, Van Rijn Products

Rijssen, June 2024 to present, part-time

- Project lead for the rollout of a new ERP system used by 50 employees, as the execution of my graduation research on lead time reduction. Saves 2 FTE.
- Advise on further automation and build AI systems for analyses.

Owner, Klaasystems

Wierden, June 2024 to present

- Automation for small businesses, such as automatic replies to Google reviews and appointment confirmations via WhatsApp. Running at 5 companies.

Sales, Digital Minds Agency

Amsterdam, April 2023 to November 2024, part-time

All-round employee, BBQ Meesterschap van Kolenboertje

December 2021 to February 2024

Data Entry Operator, Test-Correct

January 2022 to February 2023

Employee, Jumbo Supermarkten

Wierden, November 2019 to November 2022

Internships

Graduation internship, Van Rijn Products

Rijssen, February to September 2024

Research on reducing lead time, including a gap analysis of the current and desired situation.

Internship, Van Merksteijn Fencing Systems

Almelo, February to July 2022

Optimisation study of the post profiling line, graded 9 out of 10.
